## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I: Claims 1-8, drawn to a bottom case of a golf bag, classified in class 206, subclass 315.3.

Group II: Claims 9-16, drawn to 264, classified in class 264, subclass 232.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the product as claimed can be made by another process, i.e., injection molding without preparing a blowing agent and without the treating of the case by air.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
